- > Background research, assessment, and strategy development in related markets.
- > Helping to source and connect to suitable co-operation partners, for example local technicians.
- > Assistance to all action related to building a tender and securing the submission of bid.
- > Offer Local services (Installation, training, maintenance).

Business development

- > Market evaluation and market entrance plan.
- > Potential agent sourcing and evaluation, agent contracting.
- > Technical product training of technician, sales staff, hospital personnel and agents either on site or at manufacturing site.

Procurement & supply chain management

- > Global sourcing of products and manufacturers.
- > Bench marking and proposals for cost reduction strategies.
- > Management of the full purchase process (Procure-to-pay) on behalf of the client.
- > Technical product training of technicians/bio-engineers, sales staff, hospital personnel, agents.

Logistics & distribution

- > Global logistics solutions primarily in remote areas.
- > Provide global access to In-land distribution channels and partners (“last mile” transportation expertise).

Our background

We, the partners in the company, have real world experience obtained through a long background within the industry and a proven track record of strong and positive results.

We have worked with manufacturers, agents, NGO's, public institutions, governments and aid organizations on numerous projects over several years.

We have extensive experience within the global tender business, supply chain management, sourcing, business development (public and B2B activities), sales, logistics and distribution.

We hold expertise knowledge about hospital equipment, medicine and consumables.

We have an extensive network of global co-operation partners: manufacturers, local partners (agents, bio-engineers), global public agencies (UN, NGOs, ...).

The company

Action Supply is a consulting company working mainly with the supply of healthcare products to low and middle-income countries. All our services are specifically targeted to the needs and requirements of our clients across the globe. Establishing a unique relationship with each of our clients is our core value.

The tasks we execute are very diverse and include both long and short-term contracts and covers tactical, strategic and operational work. We deal with comprehensive projects and administrative day-to-day tasks with the same ease.

We take great pride in paying attention to detail and maintaining a high level of quality in all our processes. Before we enter into a co-operation, we spend time mapping and evaluating all the elements of the assignment. This ensures the best possible quality in carrying out the work and securing the best results.
